

Keeping You Informed

April 2025

Our role is to protect and improve the environment so that everyone can enjoy the benefits of a clean, safe and healthy place to live.

We are responsible for protecting the environment by regulating waste storage, treatment, recovery, and disposal.

This briefing provides an update on our regulation at Biowise Limited Permit Ref: EPR/PP3096ZA

Improvement Work Update - Ongoing monitoring work

All infrastructure improvements are now complete. The remaining Improvement Conditions require a review of how well the improvements have reduced potentially odorous emissions. This requires the improvements to be in operation for 12 months to allow us and independent specialists to gather relevant data. Monitoring was carried out over the summer period last year, and we have received the first of these reports to review. There will be another round of monitoring to come this year.

Site Fire

Last year we updated the community about the fire which started at the site in the oversize material storage piles.

In February, we conducted a follow-up site visit to assess compliance. We confirmed that the fire-affected material had been tested and removed. Additionally, the storage area had been significantly cleared, with fire breaks implemented in the remaining piles to mitigate further risk. The accompanying image shows part of the site, which has now been cleared of the affected material.

Odour Reports and Odour Monitoring

We continue to monitor odour reports made to our incident line, which can be found in the footer of this newsletter.
